

UVDB REGISTRATION

Vaylia Limited are now a registered supplier on Achilles UVDB (Cert No 320563).

Achilles UVDB construction industry accreditation and risk management scheme. It helps utility companies manage risk within their supply chain and comply with EU Procurement Legislation. It enables utility companies to assess suppliers in the utilities sector and to review relevant information that demonstrates their capability in meeting the utilities industry requirements.

From a supplier point of view Achilles UVDB is a method by which an organisation, can see and be seen by thousands of buyers in the Utilities Sector. It acts as a central repository for tenders and supplier selection for some of the biggest names in the utilities industry

Achilles was founded in Norway in 1990 with the goal of helping organisations to identify, assess, qualify, and monitor suppliers throughout the supply chain with the aim of reducing operating costs.

A standardised pre-qualification questionnaire streamlines the procurement process and manages risk. Achilles enables communities of buyers and suppliers to build better business relationships through a more open, trusting and proactive approach. Sharing knowledge, standards and best practice leads to buyers and suppliers sharing success, something very important to Vaylia as this is a cornerstone of the company's core values

Achilles registration is an important achievement for Vaylia, it is further evidence of the company's ambitious drive into the utilities industry.

Achilles has several "communities" Although pointing at different sectors, all the communities share the goal of bringing together pre-qualified suppliers with buyers working in the same sectors. Buyers can then validate their procurement decisions with the most up to date evidence about the supply chain.
