Temporary vertical concrete barriers, shortened to TVCBs, are ideal for creating safe working areas for your workforce & preventing un-authorized access to private land. They are also used as traffic barriers & to help direct traffic flow as they are crash tested. We hold stock of temporary concrete safety & security barriers. If you need barriers on a next day service, then please contact us on 0203 059 4560 These concrete safety barriers are connected at the scarf joint by M24 high tensile bolts.

Overall Length (mm) - 3150  
Modular Length (mm) - 3000  
Width (mm) - 450  
Height (mm) - 800  
Weight (kg) - 2500

These precast concrete barriers are manufactured using high strength concrete (50N/mm<sup>2</sup>). This is combined with Highways Agency specified steel reinforcement to create EN1317 "Compliant Road Restraint Systems for Temporary Safety Barriers"

Concrete safety & security barriers are also used as

Concrete vehicle security barriers

Concrete vehicle containment barriers

Hostile vehicle mitigation concrete barriers

Allows for changes in direction and ground conditions, Suitable for hard or soft ground standings, Available for rental or purchase, Suitable for permanent or temporary
